MEET PATEL

+91-9898305309 | patelmeet2135@gmail.com | github.com/Meet2135 | Gujarat, India

SUMMARY

Passionate Software Developer and AI/ML enthusiast experienced in React.js, Node.js, and Spring Boot. Skilled in building scalable applications, secure back-end systems, and intuitive user interfaces. Strong problem-solver with a drive for collaboration, innovation, and continuous learning.

EDUCATION

Pandit Deendayal Energy University (PDEU)   Gandhinagar, Gujarat
Bachelor of Technology (B.Tech)   *Aug 2022 – May 2026*

EXPERIENCE

BrainyBeam Technologies Pvt. Ltd   Ahmedabad, Gujarat
Web Design Intern (MERN Stack)   *May 2025 – July 2025*
- Worked on front-end and back-end development using the MERN stack to build responsive and dynamic web interfaces for an e-commerce and Excel analytics platform.

TECHNICAL SKILLS

Programming Languages: C, C++, Java, Python, JavaScript, Dart, SQL, HTML5, CSS3
Frameworks/Libraries: React.js, Node.js, Express.js, Spring Boot, Spring Core, Spring Security, Hibernate, Tailwind CSS
Databases: MongoDB, SQL, Firebase, Pandas
Tools/Platforms: Git, GitHub, Docker, Postman, Firebase, Appwrite, AWS, Google Colab, VS Code, Android Studio, IntelliJ IDEA, Vercel, Netlify
Computer Fundamentals: Data Structures and Algorithms, DBMS, OOPs, Operating Systems, Computer Networks

PROJECTS

Beat District - Music Streaming Platform | *MERN Stack, Cloudinary, JWT, AWS EC2*

- Developed a full-stack music streaming app with real-time playback and user-friendly UI.
- Implemented JWT-based authentication and Cloudinary for audio file uploads.
- Designed RESTful APIs with MongoDB aggregation for efficient data handling.
- Deployed the application on AWS EC2 for scalability and uptime.

Car Rental Management System | *PHP, MySQL, XAMPP, HTML, CSS*

- Built a car rental web platform with secure user authentication and session management.
- Created admin panel for CRUD operations on car listings and booking management.
- Used MySQL for backend storage and data retrieval.

AI-Based Movie Recommendation System | *Python, scikit-learn, Pandas, NumPy, Streamlit*

- Implemented collaborative and content-based filtering techniques using ML.
- Developed a user-friendly app with Streamlit for real-time personalized recommendations.
- Trained and tested on MovieLens dataset to optimize model accuracy.

CERTIFICATIONS

Cybersecurity Fundamentals — Issued by: IBM SkillsBuild (via Credly)
